Chair, Joani LaMachia called the meeting to order at 6:35 PM. Ms. LaMachia stated that the purpose of the meeting was to discuss and vote on the issues relative to funding the new Peirce School. At the meeting with the finance committee on Saturday, April 28th, it was recommended that the school department absorb the additional costs between the bid and the actual cost to build the Peirce School. The Finance Committee made the following motion:

Supt. Donovan spoke to the issue and read the motion that she would like the School Committee to approve.

Any debt service for the Peirce Elementary School arising from expenditures in excess of the amount exempted from the limitation of Proposition 2½ as voted in the Town election of April 1, 2000, or arising from that portion of the expenditures reimbursed at a rate less than the 63% by the state, or not funded by another Proposition 2½ debt exclusion or other funding sources outside the non-exempt Town Budget, shall in each year, be assigned to the School Department.

The Committee discussed the issue at length, emphasizing that the escalating construction costs are out of the control of the School Department and that this is a 'community problem' not a school problem. Members also asserted that the community voted for equity in seven schools and as a committee that trust needs to be maintained.
